

# Annual Report 2013/14

#### **CONTENTS**

#### **1 INTRODUCTION**

- 1.1 Background
- **1.2** Strategy Targets

#### 2 REVIEW OF CURRENT WASTE ARISINGS

#### 2.1 Household Waste Arisings

- 2.1.1 Number of households
- **2.1.2** Tonnes of household waste collected per household per annum
- 2.1.3 Household Waste Arisings per capita
- 2.1.4 Household waste arisings growth rate as a percentage
- **2.1.5** Percentage of household waste sent for recycling and composting as a percentage of the total household waste arisings
- **2.1.6** Percentage of household waste landfilled as a percentage of the total household waste arisings
- 2.2 Local Authority Collected Municipal Waste
  - 2.2.1 Total tonnes of local authority collected municipal waste arisings
  - **2.2.2** Local authority municipal waste arisings growth rate as a percentage
  - **2.2.3** Percentage of local authority collected municipal waste sent for recycling and composting as a percentage of the total municipal waste arisings
  - 2.2.4 Percentage of local authority collected municipal waste landfilled as a percentage of the total municipal waste arisings
  - 2.2.5 Tonnes of biodegradable local authority collected municipal waste landfilled
  - 2.2.6 Material Types collected for recycling/reuse quantities

- 3 Implementation of infrastructure and services
  - 3.1 District council collection infrastructure (table)
  - 3.2 Installed group waste infrastructure (table)
  - 3.3 Progress with procurement contracts/new infrastructure
- 4 Waste education and awareness programmes
- 5 Performance Comparison Against Previous Years
  - 5.1 Waste Prevention
  - 5.2 Recycling and Recovery
  - 5.3 Waste Planning
  - 5.4 Data and Research
  - 5.5 Legislation and Enforcement
  - 5.6 Learning and Communication
- 6 Conclusion

### Appendix

**NILAS allocation** 

### 1.0 INTRODUCTION

### 1.1 Background

- 1.1.1 This report has been prepared by the North West Region Waste Management Group<sup>1</sup> (NWRWMG) in order to assess the progress that has been made within the region towards the implementation of the North West Region Waste Management Plan 2006-2020 (WMP), which can be accessed at www.northwestwaste.org.uk
- 1.1.2 The Department of the Environment for Northern Ireland via its Planning and Environmental Policy Division has a statutory duty to make and deliver policy to meet United Kingdom (UK) and European Union (EU) obligations. The Department, therefore, has a need for information on a regular basis to carry out its functions under the Waste and Contaminated Land (NI) Order 1997. This includes reporting on the implementation/review of Waste Management Plans by District Councils in a Group format.
- This report provides an update on the current waste arisings for the 2013/141.1.3 financial year and compares them with the years of 2012/13 and 2011/12 using figures stated within the 2012/13 and 2011/12 NI Local Authority Collected Municipal Waste Management Statistic Reports, which can be accessed at (<u>www.ni-environment.gov.uk</u>). The data for 2013/14 derives from www.wastedataflow.org<sup>2</sup> and the Northern Ireland Local Authority Collected Municipal Waste Management Statistics, Annual Report for 2013/14. The report also includes a review of the actions taken by the group towards the implementation of infrastructure and assesses the measures that have been set in place to secure contracts for the collection, reprocessing and delivery to end markets of material collected within the NWRWMG region. The report compares current and projected wastes arisings against the Waste Management Strategy targets. For individual Council performance for 2013/14 year, the Northern Ireland Environment Agency has produced a Municipal Waste Management Report, which can be accessed at www.nienvironment.gov.uk.

### **1.2** Strategy Targets

- 1.2.1 The Strategy targets are based on legislation via the EU Waste Framework Directive 2008/98/EC, EU Landfill Directive 1999/31/EC, Delivering Resource Efficiency – the Northern Ireland Waste Management Strategy and the North West Region Waste Management Plan 2006-2020.
- **1.2.2** The aim of the NWRWMG Waste Management Plan is "to develop a waste management system that meets the region's needs and contributes to

 $<sup>^{\</sup>rm 2}$  WasteDataFlow is the web-based system for municipal waste data reporting by UK local authorities to government.

North West Region Waste Management Group 2013/14 Annual Report

4

<sup>&</sup>lt;sup>1</sup> The NWRWMG represents a voluntary grouping of seven district councils: Ballymoney Borough Council, Coleraine Borough Council, Derry City Council, Limavady Borough Council, Magherafelt District Council, Moyle District Council & Strabane District Council.

economic and sustainable development"<sup>3</sup>. Section 7 of the Plan sets out the diversion of biodegradable municipal waste (BMW) from landfill in compliance with the requirements of the Landfill Directive (99/31/EC). The following targets limit the quantities of BMW going to landfill in the North West region.

- 75% of 1995 levels by 2010 (NWRWMG target 89,283)
  - Actual tonnes biodegradable local authority collected municipal waste 74,958
- 50% of 1995 levels by 2013 (NWRWMG target 61,172)
  - Actual tonnes biodegradable local authority collected municipal waste 51,5251 \*(Not directly comparable to the 2010 target because of reasons stated in 1.2.3
- 35% of 1995 levels by 2020 (NWRWMG target 42,384)
- 1.2.3 The Landfill Allowances Scheme (Amendment) Regulations (Northern Ireland) 2009, which came into operation on 1 April 2009, amended the NILAS 2004 Regulations by reducing from 71% to 64% by weight, the assumed amount of biodegradable municipal waste in an amount of collected municipal waste.
- 1.2.4 Landfill Tax Escalator Landfill tax rate for 2013/14 is £72 per tonne. This rate will continue to rise by £8 per tonne until 2015. The HM Treasury announced, on 19<sup>th</sup> March 2014, that any future rise will be related to the Retail Price Index, rounded to the nearest 5 pence from April 1 2015. The increase of tax will create a greater economic burden on Councils disposing of waste to landfill, therefore creating an incentive to divert waste from landfill.
- 1.2.5 In determining the need for waste treatment capacity in England, DEFRA constructed an autoregressive integrated moving average (ARIMA) waste forecast model for household waste arisings. This generated forecasts based on past events and trends. It captured the recent moderating trend, and forecast a modest bounce back in waste arisings. The ARIMA model developed by DEFRA indicates that, in England, household waste will decline until 2011/12 followed by periods of variable growth of up to 1.3%. The projections reflect the impact of low economic growth experienced in recent years which is predicted to continue in the near future. Given the current economic conditions and the uncertainty surrounding when Northern Ireland will enter a period of sustained economic growth it is difficult to project the long term waste growth profile for the NWRWMG.
- 1.2.6 Section 5.10 of the Groups Plan sets out the targets for household recycling and composting at:
  - To recycle and compost 45% of household wastes by 2015 (Programme for Government target)

<sup>&</sup>lt;sup>3</sup> North West Region Waste Management Group, *Waste Management Plan 2006-2020*, clause ES-2, www.northwestwaste.org

North West Region Waste Management Group 2013/14 Annual Report

5

• To recycle and compost 50% of household wastes by 2020

### Local Authority Collected Municipal Waste

- 1.2.7 In agreement with the European Commission the definition of municipal waste in Northern Ireland has been broadened and this is reflected in the revised Strategy. The definition now includes waste from all households and all wastes of similar nature and composition to households, including commercial wastes, whoever collects it. Previously, the definition only included wastes which were collected by Councils and these are now defined as Local Authority Collected Municipal Waste. The revised definitions are set out below:
  - •Municipal Waste waste from households and other waste which is similar in nature to waste from a household.
  - •Local Authority Collected Municipal Waste waste that is collected by, or on behalf of, a District Council.
- 1.2.8 The revised interpretation has now brought the UK more closely into line with the approach understood to be taken by other Member States and will mean that much more commercial and industrial waste than previously now falls within the scope of the term 'municipal waste'. This is because the new definition is now based on waste types (as defined by European Waste Catalogue codes) rather than who manages the waste (i.e. district council) as was previously the case.
- 1.2.9 On the 21 and 22 November 2011 the Waste and Emissions Trading Act 2003 (Amendment) Regulations 2011 and the Landfill Allowances Scheme (Amendment) Regulations (Northern Ireland) 2011 came into effect. Their main purpose was to provide for the use of the terms "local authority collected municipal waste" and "biodegradable local authority collected municipal waste". In this publication municipal waste has been renamed to reflect that it reports on local authority collected municipal waste only. This change in terminology has no impact on the Waste Data Flow data that is reported.
- 1.2.10 The data provided has been sourced from <u>www.wastedataflow.org</u>, the Council themselves, previous Annual Reports, Northern Ireland Local Authority Collected Municipal Waste Management Statistics reports and the Landfill Allowance Scheme Regulations (2004) Northern Ireland.
- 1.2.11 In June 2012, on recommendation by the RPA appointed Local Government Boundaries Commissioner, the NI Assembly approved legislation to reduce the number of councils from 26 to 11 local government districts. It is intended that this process will be completed by April 2015.
- 1.2.12 Following the implementation of RPA, the Councils of the NWRWMG may be required to undertake a further review of the Region's Waste Management Plan taking into consideration the implications for waste management given the changes in Council administrations within the NWRWMG Group.

#### 2.0 REVIEWS OF CURRENT WASTE ARISINGS

Information for this section of the report has been compiled using WasteDataFlow information from April 2013 to March 2014. Data from previous years has also been included within this report as a means of allowing comparisons to be made against consecutive years and hence annual performance to be monitored. The data from 2012/13 and 2011/12 have been obtained from the Northern Ireland Local Authority Collected Municipal Waste Management Statistics reports. <sup>4</sup>

#### 2.1 Household Waste Arisings

For the basis of this report, the definition of 'household waste' reported derives from the Waste and Contaminated Land (NI) Order 1997 and Schedule 1 to the Controlled Waste Regulations (NI) 2002 (as amended) and means waste arising from a domestic property or other specified premises.

#### 2.1.1 Number of households

Key waste management indicators are being presented to provide an overview of the NWRWMG performance and compare them with the previous two years. The number of households with the NWRWMG is 126,901 this figure is provided in the Northern Ireland Local Authority Collected Municipal Waste Management Statistics Annual Report 2013/14. The estimated population of the North West Region is 336,157 for 2013/14<sup>5</sup>.

<sup>&</sup>lt;sup>5</sup> Household data used to calculate KPI(h) household waste arisings per household, are based on the number of households at the 2011Northern Ireland Census plus quarterly housing completion figures (up to March 2014) provided by the Department for Social Development. This source is used to ensure that the number of households is updated quarterly. Please note that in previous annual reports, the household figures were based upon the 2001 Census. It should also be noted that previously second residences / holiday accommodation were included in the annual housing figures. These have now been excluded to better represent the number of occupied dwellings.

<sup>&</sup>lt;sup>4</sup> Northern Ireland Local Authority Collected Municipal Waste Management Statistic Reports 2011/12 and 2012/13 are available at <u>www.ni-environment.gov.uk</u>

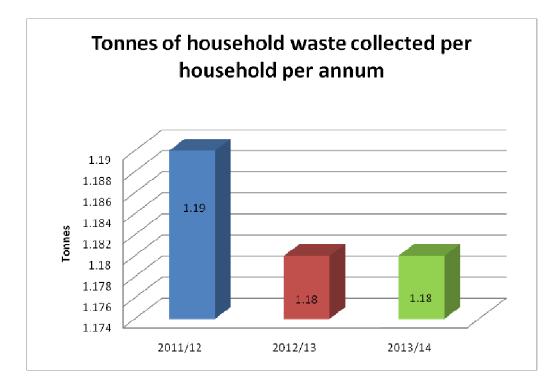

## 2.1.2 Tonnes of household waste collected per household per annum (KPI h)

The quantity of waste generated per household, calculated as the quantity of household waste produced in a region divided by the number of households, provides an indicator of trends in household waste arisings.

Table 1

Year	2011/12	2012/13	2013/14
Tonnes collected per			
household	1.19	1.18	1.18

## Figure 1

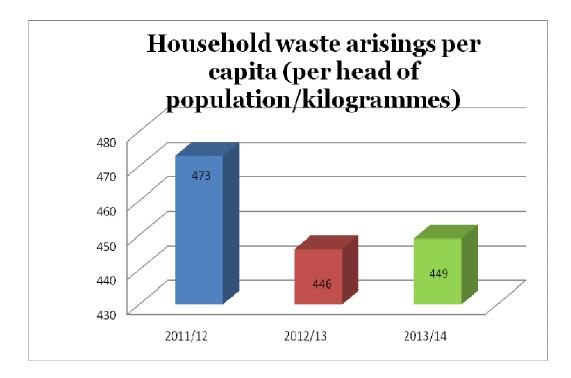

## 2.1.3 Household Waste Arisings per capita (KPI p)

Table 2

Figure 2

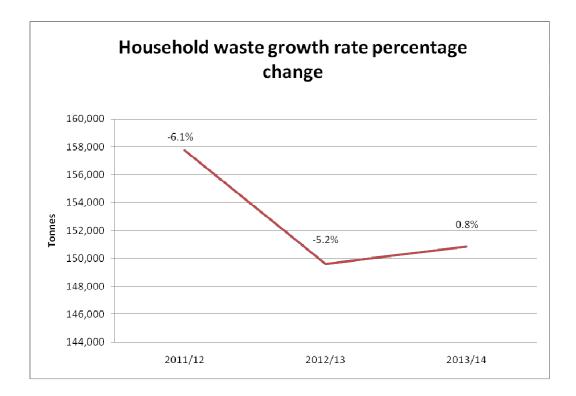

9

## 2.1.4 Household waste arisings growth rate as a percentage

Table 3

Year	2011/12	2012/13	2013/14
Households Waste Arisings Totals tonnes	157,733	149,607	150,844
Growth rate percentage <sup>6</sup>	-6.1%	-5.2%	0.8%

Figure 3

The household waste arisings in tonnes for NWRWMG per year have been presented in Table 3 above. The data has been compiled from the Northern Ireland Local Authority Collected Municipal Waste Management Statistics Reports, 2011/12, 2012/13 and 2013/14.

 $^{6}$  In 2010/11 the total tonnes of household waste arisings for the Group was 167,949

North West Region Waste Management Group 2013/14 Annual Report

10

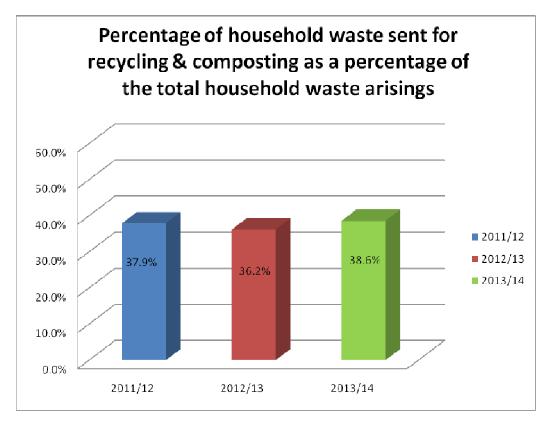

## 2.1.5 Percentage of household waste sent for recycling and composting as a percentage of the total household waste arisings (KPI a)

Table 4

Year	2011/12	2012/13	2013/14
Total in tonnes of household waste arisings	157,733	149,607	150,844
Total tonnes of household dry recycling and composting	59,786	54,190	58,190
Total percentage of household waste sent for recycling and composting as a percentage of household waste arisings	37.9%	36.2%	38.6%

Councils within the North West Region Waste Management Group intend to expand or develop Biowaste kerbside collection systems in order to increase the recovery rates of both household and municipal waste.

Figure 4

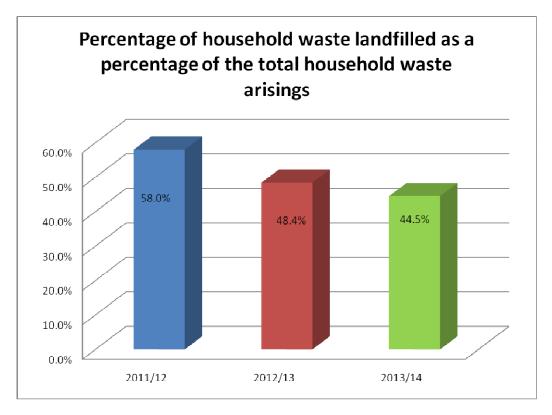

The average household recovery rate for the NWRWMG during 2013/14 was 38.6% an increase of 2.4% on the 2012/13 figures.

2.1.6 Percentage of household waste landfilled as a percentage of the total household waste arisings (KPI b)

Year	2011/12	2012/13	2013/14
Total in tonnes of household waste arisings	157,733	149,607	150,844
Total tonnes of household waste landfilled	91,429	72,471	67,104
Percentage of household waste landfilled as a percentage of the total household waste arisings			<i>a</i>
	58.0%	48.4%	44.5%

Figure 5

The figures in the above table show a reduction in household waste landfilled of 3.9% from 2012/13. Note: The percentage of recycled (including composted) and landfilled waste may not always equal 100% because the recycling measures were defined to capture outputs from recycling processes which exclude energy recovery and reuse.

## 2.2 Local Authority Collected Municipal Waste (LACMW)

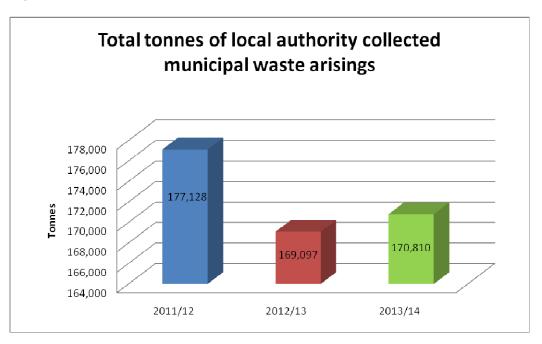

LACMW refers to the previous 'municipal' element of the waste collected by local authorities; that is, household waste and business waste where collected by the local authority and which is similar in nature and composition as required by the Landfill Directive.

## 2.2.1 Total tonnes of local authority collected municipal waste arisings (KPI j)

Table 6

Year	2011/12	2012/13	2013/14
Total tonnes of local authority collected municipal waste	177,128	169,097	170,810

Figure 6

The figures in the above table show an increase in local authority collected municipal waste arisings of 1.0% from 2012/13.

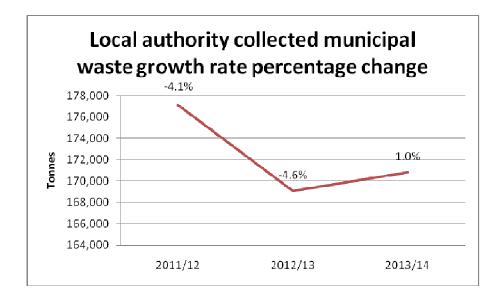

## 2.2.2 Local authority collected municipal waste arisings growth rate as a percentage (KPI n)

Table 7

Year	2011/12	2012/13	2013/14
Total tonnes of local authority collected municipal waste	177,128	169,097	170,810
Local authority collected municipal waste growth rate <sup>7</sup>	-4.1%	-4.6%	1.0%

The total amount of municipal waste arising in the Group in 2013/14 is 170,810 tonnes. The level of waste growth reduction has a significant effect on environmental impacts, costs and the amount of disposal infrastructure needed to meet the EU landfill diversion targets.

### Figure 7

 $^7$  In 2010/11 the total tonnes of municipal waste arisings for the Group was 184,798

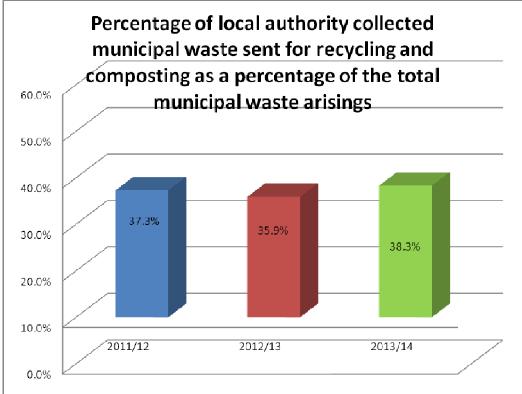

**2.2.3 Percentage of local authority collected municipal waste sent for recycling and composting as a percentage of the total local authority collected municipal waste arisings (KPI e)** 

Table 8

Year	2011/12	2012/13	2013/14
Total in tonnes of local authority collected municipal waste arisings	177,128	169,097	170,810
Total in tonnes of local authority collected municipal dry recycling and composting	65,989	60,653	65,404
Percentage of local authority collected municipal waste sent for recycling and composting as a percentage of the total local authority collected municipal waste arisings	o= 0%	o= 0%	-00V
	37.3%	35.9%	38.3%

Councils within the North West Region Waste Management Group have expanded or are to implement biowaste (food waste collections) kerbside collection systems in order to increase the recovery rates of both household and municipal waste.

## Figure 8

The average municipal recovery rate for the NWRWMG during 2013/14 was 38.3% an increase of 2.4% on the 2012/13 figures.

## recycle

North West Region Waste Management Group 2013/14 Annual Report

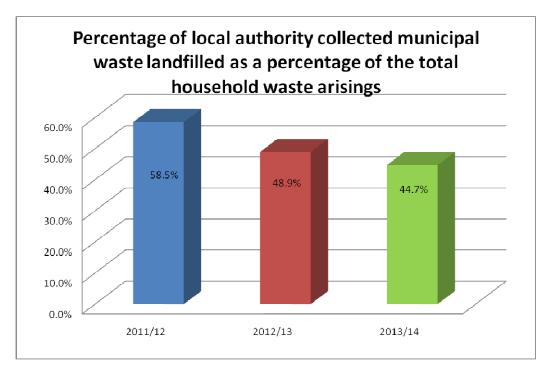

15

**2.2.4 Percentage of local authority collected municipal waste landfill as a percentage of the total local authority collected municipal waste arisings (KPI f)** 

Table 9

Year	2011/12	2012/13	2013/14
Total in tonnes of local authority collected municipal waste arisings	177,128	169,097	170.810
Total tonnes of local authority collected municipal waste landfilled	103,654	82,705	76,351
Percentage of local authority collected municipal waste landfilled as a percentage of the total local authority collected municipal waste arisings	58.5%	48.9%	44.7%

Figure 9

The figures in the above table show a reduction in local authority collected municipal waste landfilled of 4.2 % from 2012/13. The percentage of recycled (including composted) and landfilled waste may not always equal 100% because the recycling measures were defined to capture outputs from recycling processes which exclude energy recovery and reuse.

North West Region Waste Management Group 2013/14 Annual Report

16

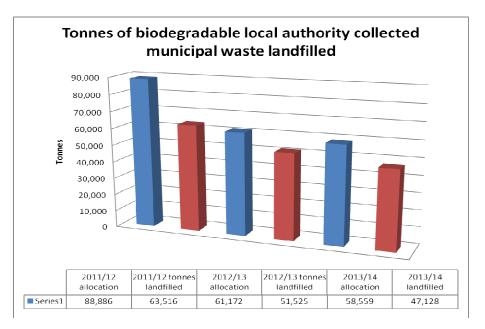

## 2.2.5 Tonnes of biodegradable local authority collected municipal waste landfilled (KPI g)

Table 10

Year	2011/12	2012/13	2013/14
Allocation in tonnes	88,886	61,172	58,559
Tonnes of biodegradable local authority collected municipal waste landfilled	63,516	51,525	47,128
Allowances available after			
utilisation	25,370	9,647	11,431
% of available allowances utilised	71.5%	84.2%	80.5%

Biodegradable Local Authority Collected Municipal Waste landfilled – The total tonnage of Biodegradable Local Authority Collected Municipal Waste (BMW) sent to landfill in the NWRWMG region in 2013/14 was 47,128 tonnes, which is 19.5% less than the allocated (58,559) allowance. (See appendix 1 for the Group's NILAS Allocation). This indicator is a statutory requirement set out in the Group's Waste Management Plan, Section 7 of the Plan sets out the diversion of biodegradable municipal waste (BMW) from landfill in compliance with the requirements of the Landfill Directive (99/31/EC).

### Figure 10

## 2.2.6 MATERIAL TYPES COLLECTED FOR RECYCLING/REUSE QUANTITIES 2013/14

### Table 11

	Amount Collected (tonnes)

As a component of Waste Prevention, re-use is defined in the Waste Framework Directive (WFD) as any operation by which products or components that are not waste are used again for the same purpose for which they were conceived. The WFD requires member states to take measures to promote the re-use of products.

The councils of the NWRWMG have supported this concept and some member councils are actually engaging with social enterprise reuse facilities through the supply of feedstock.

## Table 13a

Type of Infrastructure	Facilities at Start of Reporting Year	Facilities at End of Reporting Year
Social Enterprise Reuse Facilities linked to Council services	Refurnish (Green Shed)	Refurnish (Green Shed) 4Rs Reuse Centre

## 3.3 Progress with procurement contracts/new infrastructure

- 3.3.1 The NWRWMG is committed to achieving a recycling / composting rate of **50%** as outlined in Article 11 of the revised Waste Framework Directive of 2008 by 2020. It remains the responsibility of Councils to manage this waste in the most efficient and environmentally friendly manner possible.
- 3.3.2 Common practice until recently has been to send this waste, known as municipal residual waste, to landfill to be buried. However, due to European Union (EU) regulations (as stated in section 1.2) and growing opportunities to treat waste as a resource, NWRWMG is adopting alternative strategies to reduce the levels of waste landfilled. Failure to meet EU landfill diversion targets could lead to significant infraction fines for local Councils.

## 4 WASTE EDUCATION AND AWARENESS PROGRAMMES

There has been significant progress in the NWRWMG Region in 2013/14 with regard to Waste Education and Awareness Initiatives. All member councils have carried out Waste Awareness Initiatives. The aim is to raise awareness, encourage best practice and achieve behavioural change by all stakeholders, in order to effect a cultural shift towards better resource management and improved environmental quality.

<u>Recycling Officers</u> <u>Forum</u>	• To review education and awareness elements and provide a forum for sharing information and best practice	Recycling Officers	<ul> <li>Meeting bi-monthly</li> <li>Discuss group educational activities and co-ordinate deliverables such as content for the Web-site, events and studies</li> <li>Co-Hosted with the two other waste management groups (arc21 &amp; SWaMP2008), along with the Waste Resource Action Programme, Charter Institute for Waste Management N. I. and the LARAC on a Waste Prevention &amp; Recycling Seminar in December 2013.</li> <li>Develop a Bring &amp; Share event for officers organised by officers in 2014/15</li> </ul>

## Table 21

Communication Objective	Scope	Target audience	Activities
<u>Coordinate</u> <u>Activities with the</u> <u>DOE</u>	<ul> <li>Work in partnership to deliver elements of the Waste Management Plan</li> <li>Sit on Waste Prevention Forum</li> </ul>	DoE, Schools, community groups other regional groups	<ul> <li>Promote Rethink Waste</li> <li>Promote national campaigns</li> <li>Include D.o.E. officers in the Recycling Officers Forum &amp; communications activities</li> </ul>

### **5** PERFORMANCE COMPARISON AGAINST PREVIOUS YEARS

The below tables indicate how the NWRWMG has performed in relation to the targets set out in its Waste Management Plan (WMP) and NILAS targets.

Table 22

Tonnes of biodegradable local authority collected municipal waste landfilled	2011/12 Allocation	2011/12 Landfilled	2012/13 Allocation			2013/14 Landfilled
NWRWMG total	88,886	63,516	61,172	51,525	58,559	47,128

The NWRWMG is implementing additional measurers to achieve the target as outlined in section 5 of the NWRWMG Waste Management Plan

## Table 23

Household recycling rate	2011/12	2012/13	2013/14
NWRWMG total	37.9%	36.2%	38.3%

### Table 24

Local authority collected Municipal recycling rate	2011/12	2012/13	2013/14
NWRWMG total	37.3%	35.9%	38.6%

### 5.1 Waste Prevention

- 5.1.1 In order to minimise impact on the environment, improve resource efficiency and reduce the cost of waste management, stabilising waste generation is at the core of the Northern Ireland Waste Management Strategy and the NWRWMG Waste Management Plan.
- 5.1.2 In recognition of the importance of Waste Prevention and the un-sustainability of high waste growth rates, the Group set limits for annual growth of just over 1% in municipal waste over the Plan period (section 7.27 of the WMP), up to 2020.
- 5.1.3 As shown in the figures in section 2.2.2 of this report the growth rate last year has risen to the target set in the WMP. This may be a result of the upturn in the economy.
- 5.1.4 Section 6 of the NWRWMG Waste Management Plan outlines the Group's **Waste Prevention** activities that reduce both the quantity and the hazardous character of waste. It can be broken down into three types of actions:
  - Avoidance: the avoidance of waste generation for example, by buying fewer items, reducing wastes or using less material per unit.
  - Reduction: reduction at source
  - Re-Use: involves the multiple use of a product in its original form
- 5.1.5 Over the course of the year the Group and its member councils have continued to work on education and awareness raising campaigns with community groups, schools, householders and businesses.
- 5.1.6 Since 2006 over 73,000 home composting units have been supplied to householders within the region. In addition, four of the seven local authorities offer brown bin collections for organic waste.

### 5.2 Recycling and Recovery

- 5.2.1 Section 5.10 of the Group's WMP sets out the target for household recycling and composting at 45% by 2015. The North West Region Waste Management Group current rate of recycling is 38.3%. Councils have recognised the need to increase performance in the area of organics and are taking action to improve this with Councils securing capital funding opportunities to either include food waste collections with existing garden waste services or implement new services for the collection of separately collected food waste from households and businesses.
- 5.2.2 Section 7 of the WMP sets out the diversion of biodegradable local authority collected municipal waste (BMW) from landfill in compliance with the requirements of the Landfill Directive (99/31/EC). This limits the quantities of BMW going to landfill through the Northern Ireland Landfill Allowance Scheme (NILAS).

- 5.2.3 The North West Waste Management Group has consistently met its NILAS targets over the last number of years. In 2013/14 the group was allocated 58,559 tonnes of biodegradable municipal waste that it could send to landfill, however it sent 47,128 tonnes to landfill, which is 19.5% less than the allowance.
- 5.2.4 Section 5.10 of the WMP sets out the target for Local Authority Collected Municipal Recycling and Composting (including preparing for reuse) at 60% by 2020.
- 5.2.5 To meet the 2020 targets set out in the WMP it will require additional investment in resources and facilities to be undertaken by the local authorities. The NWRWMG undertook the following initiatives in 2013/14:
  - Promoted the range of materials collected for the kerbside collection of mixed dry recyclables with the addition of mixed bottles and glass
  - Carried out a content review of the Waste Management Plan per article 30 of the revised Waste Framework Directive
  - Promote the NWRWMG web-site <u>www.northwestwaste.org.uk</u>
  - Awarded the contract for the treatment of biowaste
  - Managed the contract for the Treatment of NWRWMG collected commingled waste from Household Waste and Recycling Centres & other council services
  - Managed the contract for the haulage, treatment and disposal of NWRWMG collected Local Authority Residual Municipal Waste (Short Term Contract)
  - Managed the contract for the receipt, transfer, processing/brokerage to end markets of wheeled bin, kerbside collected commingled dry recyclables.
  - Managed the contract for the Collection and Recycling of Tyres in conjunction with the Southern Waste Management Partnership
  - Managed the contract for the Collection, Disposal & Treatment of engine oil, vegetable oil, paints, varnishes & used engine oil containers in conjunction with the Southern Waste Management Partnership
  - Managed the framework agreement for Waste –Related Consultancy Services Framework Agreement in conjunction with the Southern Waste Management Partnership
  - Managed the contract for the Collection and Processing of WEEE Material from Designated Collection Facilities under Council Control within the Arc21 and North West Regions
  - Managed the contract for the Collection and Processing of Waste Batteries and Accumulators from Designated Collection Facilities under Council Control within the Arc21 and North West Regions

- A working group has been established to develop tender specifications for:
  - the treatment of NWRWMG collected commingled waste from Household Waste and Recycling Centres & other council services
  - the haulage, treatment and disposal of NWRWMG collected Local Authority Residual Municipal Waste
- Councils secured and delivered via a Rethink Waste Fund various infrastructure/service support projects.

### 5.3 Waste Planning

- 5.3.1 In line with the review of the Waste Management Plan the Councils of the North West Region Waste Management Group will continue to investigate appropriate short to medium term service contracts that will assist Councils to remain compliant, meet their statutory obligations and encourage increased levels of reuse and recycling.
- 5.3.2 The NWRWMG conducted a review of the Waste Management Plan 2006-2020 and consulted on the review during October/November 2013.

### 5.4 Data & Research

5.4.1 The councils of the Group continue to populate data for Waste Data Flow, which is a system for municipal waste data reporting throughout the UK (www.wastedataflow.org).

### 5.5 Legislation and Enforcement

5.5.1 The Group has taken into account the revised EU waste framework directive 2008/98/EC, which increases the household recycling target from 45% to 50% by 2020. The Programme for Government target has a household waste recycling rate of at least 45% by 31 March 2015.

### 5.6 Learning and Communications

- 5.6.1 The aim of learning and communications is to raise awareness, encourage best practice and achieve behavioural change by all stakeholders, in order to affect a cultural shift towards better resource management and improved environmental quality.
- 5.6.2 There has been progress in the NWRWMG Region in 2013/14 with regard to Learning and Communications. All member councils have carried out Waste Awareness Initiatives and Home Composting promotions (see section 4.0 of this report). In addition, the Group has a revised web-site (<u>www.northwestwaste.org.uk</u>) and has been involved in Rethink Waste campaigns run by the Department of the Environment, including;
  - Love Food Hate Waste campaign aims to raise awareness of the need to reduce food waste. The campaign shows that by doing some easy practical everyday things in the home we can all waste less food, which will ultimately benefit our purses and the environment too.

- **Environmental Youth Speak** is a public oration competition run on two levels; a junior section for Key Stage 2 and a Senior section for Key Stage 3.
- **Eco-Schools** is one of five environmental education programmes run internationally by the Foundation for Environmental Education (FEE). In addition to Eco-Schools, FEE runs Green Key, Young Reporters for the Environment, Blue Flag and Learning about Forests. There are 46 countries around the world that run the Eco-Schools programme, linking more than 40,000 schools from the UK to France and from Morocco to South Africa. Eco-Schools is administered in Northern Ireland by Tidy Northern Ireland.
- **The Junk Kouture competition** is a national competition for second level students in Ireland and Northern Ireland which challenges teenagers to create high-end wearable fashion from everyday junk and waste materials that would normally find its way into the bin. Junk Kouture aims to inspire and ignite passion in these teenagers while at the same time subtly educating them about the importance of recycling and reusing waste for the good of the planet.
- **The European Week for Waste Reduction** (EWWR), which focused on highlighting waste reduction activities across Europe, took place from 16th to 24th November 2013. People were called on to participate in reducing waste, no matter how big or small the action - whether it be on your own or with your family at home, with your local community or with colleagues in work or in school.
- 5.6.3 The Recycling Officers Forum for the Northwest meets on a bi-monthly basis to develop ongoing waste management initiatives and share best practice.

### 6.0 Conclusion

- 6.1 The annual report for the NWRWMG for 2013/14 has shown some increase in Household & Local Authority recycling & composting rates and a continued decrease of the amount of waste being sent to landfill.
- 6.2 The NWRWMG total tonnage of Biodegradable local authority collected Municipal Waste (BMW) sent to landfill in 2013/14 was 47,128 tonnes, which is 19.5 % less than the allocated (58,559) allowance. (See appendix 1 for the Group's NILAS Allocations).
- 6.3 Councils within the North West Region Waste Management Group expanded and developed biowaste kerbside collection systems in order to increase the recovery rates of both household and municipal waste, however there is a need to ensure that current initiatives continue, including:
  - Communications and learning
  - The 4Rs Reuse Centre was launched
  - Review of revision of appropriate short to medium term service contracts to ensure compliance
  - Education raising campaigns with households, the community and others
